21. Wellcome to All Group Members

Yahoo group: charc
Date: 2006-11-03 04:52:21 UTC
From: Mark Robinson
Topic: 21 Message: 21

Hi and thanks for taking the time to join the Central Highlands
Amateur Radio Club (CHARC) Yahoo! Group.
Please take a few minites when you can to check out the Photo's
section on the web site. There are 3 sections at the moment with
pic's of the recent get-togethers at Camp Fairbairn, A collection of
photo's of past and present members and a folder on our repeater
sites and the maintaince and upgrades that are being undertaken.
In the Files section there are a few handy files you can download
and use at will. As well as the File section you will find some
handy links on the internet regarding Amateur Radio.
Futhermore in the Database section is a list of Repeaters and
frequiencies found around the Central area. Also Times and
Freqiencies of local club nets and WIA and QTAC infomation. I have
also encluded a member address book and phone book as this can only
be access by members only. It will help if your travelling or
visiting an area and can make contact. Please feel free to add your
own infomation into the database.
I also ask of anyone who may have some earlier photo's of members
and there activities so I can post them for all to see. I also will
need some ongoing help with Callsigns, Names and Dates that i'm not
sure of.
Finially please show and pass this site of our group onto anyone you
know who has been involved with the Chentral Highlands Club and may
want to join and keep in touch. It is here for us all to keep
intouch and to know what is happening around us.
Once again your input with Photos, Files, Links to great sites and
data in the Database on club Nets and repeaters will be greatfully
accepted.
Reminder of our new Club Net on 80 M at 8-00 PM on 3.618MHz Friday
evenings, all welcome. Looking forward to hearing everyone.

Cheers 73's

News from Clive VK4ACC from WIA Staff

If they go into the website and fill in the form there, then send it off, a copy is sent to our office, so that it can be checked, forwarded on the appropriate person and followed up. This is a new process just put in place as there seemed to be a big hold up in getting any action, so hopefully, this is making the process a bit quicker.

If they still have a problem, then they can contact the office and talk to Margaret, and get her to follow it up.

Hope this helps, and don't worry about how many times you need to contact us, that is not a problem. Only too happy to help.

Regards
Dianne :-)

103. A Poll on 12 V DC Power Connectors

Yahoo group: charc
Date: 2007-08-15 22:24:51 UTC
From: Bill Sebbens
Topic: 103 Message: 103
Attachments: 3 described; binary payloads are missing from this source WARC

Hi All,

In order to find which 12 V DC connectors are the most used, I would
like you to tell me which ones are in your shack/mobile.

Have a look at the piccys,
then select `reply',
delete my answers
then put in the your answers

and send back to me.
(for the number- just approx will do)

73 de Bill

---
1. Do you use these 32V `T' connectors (Y/N)

2. How many would you have in your possession.(No.)

3. Which poles do you use as +ve & -ve ?
---

4. Do you use the Automotive (plastic) `T' (Y/N)

5 How many would you have in your possession.(No.)

6. Which poles do you use as +ve & -ve ?
---

7. Do you use these Anderson Power Pole connectors (Y/N)

8. How many would you have in your possession.(No.)

9. Which poles do you use as +ve & -ve ?
---

10. Do you use any other type of connectors (Y/N)
Please describe

11. How many would you have in your possession.(No.)

12. Which poles do you use as +ve & -ve ?

Thanks

Bill vk4xz
vk4xz@...

[PS My answers]
[1. Y]
[2. 15 F, 10 M]
[3. radial pin is -ve/earth (just like 3 pin)]
[4. Y]
[5. 8 F, 6 M]
[6. Vert is -ve, Hor is +ve]
[These are the ones I installed in the Club & Van]
[I am gradually changing my gear from type 1 to 4]
[7. N]
[8. nil]
[9. red +ve, black -ve]
[10. Only as supplied on chargers for Hand Helds etc)
[11. 4]

108. Standards-Proposed-for WICEN Qld-v1.doc

Yahoo group: charc
Date: 2007-08-30 00:39:26 UTC
From: Bill Sebbens
Topic: 108 Message: 108

Hi
I have been taken to `task' because I got the se x es mixed up
on the connectors.
(one would think that someone my age would be able to tell males
from females? Oh well !) Anyway I reckon these are bi- se xual.

Now this first three lines are correct.

"2. 12 V Plugs & Sockets ? Automotive Polarised. (`T? configuration)
Details ? ?Narva? brand, Male 2 Way Connector P/No 56252, Female 2 Way
Connector P/No 56262."

BUT - below -where I have `female' apparently should be male -

"And, of course, of the connectors, the `female'; the one with the
non-exposed connections is the hot side."

Its the one that does the `goes-inter' so it is apparently called the
male. BUT it has the `hollow' brass bits of which the opposite
(apparently the female) has flat brass bits that goes-inter the
aforementioned one. [bi-s ex ual?]
That was my reasoning.
(go back to the doc & look at the piccy)

But what really matters is the hunk of plastic with the bits of brass
that cannot short to anything should be the one connected to the power.
And I believe any logical ham would connect them that way.
No bit deal to me whatever it is called.!!

So there you are. Draw your own 'exual conclusions.

I'll put out an amendment - version 2 - soon.

127. 2007 AGM Report by Gavin VK4ZZ

Yahoo group: charc
Date: 2007-10-03 02:04:03 UTC
From: Mark Robinson
Topic: 127 Message: 127

The Central Highlands Amateur Radio Club AGM was held last weekend at Camp Fairbairn, near Emerald.
Many of the attendees rolled in from near and far on Friday evening and enjoyed catching up on happenings and the occassional tall story plus there was a little bit of VHF ducting happening there and about to keep things exciting. There was also an informative OccHaz talk from John the EQ Caretaker.

During Saturday more attendees arrived and staked their claim to tables and bunks and the treasure trove of tech and produce goodies also increased in size.

Saturday evenings activities proceeded well with the the AGM Banquet put together well by Dot, Dawn and helpers and the meat tortured into a cooked state by Gavin.

Next came the AGM chaired by Mark VK4KMR.
Mark welcomed everyone and said a special hello to those attending for the first time. Mark advised all that the first meeting to establish the club was held 20 years ago in Clermont. There were still 3 original members with the club in the forum - Mal VK4FPL, Gordon VK4KAL and Mark VK4KMR.

Mark then implored members to put the Club website to better use - log in and check out all the different sections only available to members.
http://au.groups.yahoo.com/group/charc/

The 2006 AGM minutes were read and Mark acknowledged the support of many members who live outside the Central Highlands region.

Dot Loveday read the Financial Report and gave a comprehensive rundown about the various report entries.

Mark VK4KMR then advised the meeting about the successful ongoing upgrade of the Central Highlands Repeater System Linking project & APRS coverage. Mark then declared all positions vacant and called upon Gavin VK4ZZ to conduct the election of office bearers for 2008.

The following office bearers were duly elected -
President Mark Robinson VK4KMR
Vice President Steve Woods VK4SMW
Secretary Gordon Loveday VK4KAL
Treasurer Dot Loveday
Technical Officer Steve Woods VK4SMW
Committee Member Harry Cox VK4LE
Committee Member Roy Moore VK4YRO

Meeting control was handed back to Mark VK4KMR and the AGM Raffle Draw took place
Winner of the DSE Solder Station was George VK4AJL
Winner of the Weller Solder Pen was Tony VK4HOG

Some items covered in General Business included the generous offer from Roy VK4YRO to maintain the Mt Seaview repeater licence on behalf of the club and a suggestion from Mark VK4KMR to establish a 10-30am Sunday call-in on the linked repeater system.

The Monster Auction then got underway with Wal VK4AIV as the auctioneer of renown aided by Bill VK4XZ as the barrel girl. Many interesting tech items found new homes, there was frantic bidding for the produce and mystery items and a number of new equipment items with reserve prices raised much needed funds for the club.

The AGM concluded with a powerpoint presentation by Mal VK4FPL (putting on his Carbon CRC hat) about current moves to make Carbon Sequestration a viable means to protect the environment.
The traditional Late Night talkies went into the early hours.

Sunday morning highlight was the Recovery Breakfast with head cook Marianne Hayward providing a succulent range of food to bolster the trip back home.
Farewells were made with many indicating that they would be back for the 2008 AGM weekend.

Attending were
Gordon VK4KAL Rubyvale
Dot Loveday Rubyvale
Bill VK4XZ Maleny
Dawn VK4HER Maleny
Rusty VK4JM Bundaberg
Joscelyn VK4JJ Bundaberg
Gary VK4GSH Gladstone
Marianne Hayward Gladstone
Gus VK4NRA Calen
Wal VK4AIV Marian
Cheryl VK4FRYL Majestic Towers
John VK4FNQ Majestic Towers
George VK4AMG Albany Creek
Helen McLucas Albany Creek
Gavin VK4ZZ Vincent
Lyndall VK4ZM Vincent
Rob VK4TWR Gladstone
Tracey Waegele Gladstone
Michelle Waegele Gladstone
Graham VK4NFZ Bouldercombe
Roy VK4YRO Sarina
Tony VK4HOG Sarina
Mick VK4OG Mt Mee
Bruce VK4VRO Gracemere

Gordon VK4GM Rockhampton
Chris VK4VKR Rockhampton
Clive VK4ACC Rockhampton
Leigh VK4YLW Rockhampton
Mark VK4KMR Dysart
Mal VK4FPL Brisbane
Val Lees Brisbane

140. WICEN Info - All about the Firies Network in one easy lesson

Yahoo group: charc
Date: 2007-11-26 02:17:18 UTC
From: Bill Sebbens
Topic: 140 Message: 140

Hi
Just to give you an understanding of the networks, I have written an
article covering the QFRS channels/frequencies.
It is written specifically for the NCR/Sunshine Coast, but the
principles apply throughout Qld. I didn't attach it as some may
not be interested & there is no point in foistering their mailbox
if such is the case.

I have almost finished writing one for the SES so
that little gem? will follow in due course.

In more due courses, I shall write ones on QAS & Councils.

It is important that you have some understanding, as sometimes
WICEN may be asked to contact them.

I have placed the file in the Files area of the SCARC Yahoo server,
Thus it may be downloaded from there. For those not able to do so,
just ask & I shall send you a copy.

It should be read in
conjunction with the channel charts which are available
from http://vk4radio.info

If anyone cannot read the Word file, tell me & I shall send you a Text
copy. (loses the formatting but is still readable)

Those that don't have Word may like to consider getting
`Open Office'. I `believe' it does all that Word & Excel do & it's Free.
It can be downloaded but maybe ask & you will find someone in
the club has a CD of it.

If there is anything you do not understand, please ask & I shall
endeavour to answer.

141. Repeater Reports

Yahoo group: charc
Date: 2007-12-04 02:51:02 UTC
From: Mark Robinson
Topic: 141 Message: 141

Hi All,
It's been quiet, on here lately, so I though I would wake everyone up. Now to some updates.
Springsure Repeater had a visit by Steve VK4SMW & Harry VK4LE recently to give it a once over. Checking Batteries, Solar Panels & Radio equipment. Some mods to the diplexer and the removal of the preamp has stopped some interference on the voice repeater link system from the APRS Digi there on that site.

Middlemount linking hub site had a visit from Steve VK4SMW & Mark VK4KMR as well for a badly need once over. Steve set about installing a new preamp in the receiver while I cranked up the wiper-sniper and made a clearing around the repeater site from the jungle that was growing. Thankfully we had a whole roll of cord and some reserve fuel. Antennas where checked for alignments and the test set hooked up to the repeater for some final test before departing.

Blackdown repeater has been reported that it could have problems over the last few weeks by some so a trip up there may be needed again. Field test seem to be ok, it might only be changes in weather. Steve VK4SMW & Mark VK4KMR visited there about 6 weeks ago to give it a check up. A tidy up of the coax cables and reinstall of another solar panel has boosted this site. Repeater,antenna's & batteries were all checked & a tidy up around the site.

Mt Seaview is up and working as reported. Roy VK4YRO, Tony VK4HOG & Steve VK4SMW have installed the equipment into a new hut built by Roy. A new antenna was installed on top of the tower by Tony the spiderman with new runs of LDF450 coax's. Steve find tuned his work on the repeater and presto it's been working like nothing before. I worked the repeater with a handheld from the Airport in Mackay when returning from Brisbane, Wonderful. Alan VK4DMT of Nebo has worked into the repeater testing it, while driving about North of Glendon, South to the Dysart tun off & West to the Moranbah turn off and of course East into Mackay, Sarina & even at Roy's VK4YRO QTH in among the hills. Steve wont be back to soon as he had to visit the hospital after leaving the site with a large rash. Vic's in the Qld bush don't mix.

Sarina Repeater is experiencing problems with the link back into Middlemount. Roy VK4YRO and Spiderman Tony VK4HOG have visited the site a few time of late when weather permits to fine tune & align the link antennas. It is a long haul with some large hills yet there is a path most of the day, so this is still ongoing with a few scratching there heads.

Hodgson Range repeater is still off with problems. Tony VK4HOG, Roy VK4YRO & Mark VH4KMR attempted some time back to ride up on Roy's 4 wheeler and was called off a third way up. I will be making another reckon trip in my off-road buggy now that it's back going, to see if a suitable path can be found to gain better access to the site.

Thats all folks, for the moment

Cheers 73's
Mark VK4KMR

199. Good Advice about emails - or how to forward an email properly!!

Yahoo group: charc
Date: 2008-06-07 21:37:49 UTC
From: Bill Sebbens
Topic: 199 Message: 199

99% of you do it right, but I'll bet you have some friends that are guilty.!

-------- Original Message --------
Good Advice about emails - or how to forward an email properly!!

Words To Live By.

A friend who is a computer expert received the following directly from a system administrator for a corporate system. It is an excellent message that ABSOLUTELY applies to ALL of us who send e-mails. Please read the short letter below, even if you're sure you already follow proper procedures.

Do you really know how to forward e-mails? 50% of us do; 50% DO NOT.

Do you wonder why you get viruses or junk mail? Do you hate it? Every time you forward an e-mail there is information left over from the people who got the message before you, namely their e-mail addresses and names. As the messages get forwarded along, the list of addresses builds, and builds, and builds, and all it takes is for some poor sap to get a virus, and his or her computer can send that virus to every E-mail address that has come across his computer. Or, someone can take all of those addresses and sell them or send junk mail to them in the hopes that you will go to the site and he will make five cents for each hit. That's right, all of that inconvenience over a nickel! How do you stop it? Well, there are several easy steps.
Try the following if you haven't done it before:

(1) When you forward an e-mail, DELETE all of the other addresses that appear in the body of the message (at the top). That's right, DELETE them. Highlight them and delete them, backspace them, cut them, whatever it is you know how to do. It only takes a second. Of course, you MUST click the 'Forward' button first and then you will have full editing capabilities against the body and headers of the message. If you don't click on 'Forward' first, you won't be able to edit the message at all.

(2) Whenever you send an e-mail to more than one person, do NOT use the To: or Cc: fields for adding e-mail addresses. Always use the BCC:(blind carbon copy) field for listing the e-mail addresses. This is the way the people you send to will only see their own e-mail address. If you don't see your BCC: option click on where it says To: and your address list will appear. Highlight the address and choose BCC: and that's it, it's that easy. When you send to BCC: your message will automatically say 'Undisclosed Recipients in the 'TO:' field of the people who receive it.

Some Servers demand an actual `To:' address; in that case
put in your own or as I do, I have a `throw-away' address on
`Yahoo' that I place in the `To:' field.

(3) Remove any 'FW :' in the subject line. You can re-name the subject if you wish or even fix spelling.

(4) ALWAYS hit your Forward button from the actual e-mail you are reading . Ever get those e-mails that you have to open 10 pages to read the one page with the information on it? By Forwarding from the actual page you wish someone to view, you stop them from having to open many e-mails just to see what you sent.

(5) Have you ever gotten an email that is a petition? It states a position and asks you to add your name and address and to forward it to 10 or 15 people or your entire address book. The email can be forwarded on and on and can collect thousands of names and email addresses. A FACT: The completed petition is actually worth a couple of bucks to a professional spammer because of the wealth of valid names and email addresses contained therein. DO NOT put your email address of any petition. If you want to support the petition, send it as your own personal letter to the intended recipient. Your position may carry more weight as a personal letter than a laundry list of names and email address on a petition. (And don't believe the ones that say that the email is being traced, it just ain't so!). And
don't bother to reply to say, an American (or whatever),
petition - Do you really think an Aussie name is going to mean anything to an American politician ?

Some of the other emails to delete and not forward are:

1. The one that says something like, 'Send this email to 10 people and you'll see something great run across your screen.' Or sometimes they'll just tease you by saying 'something really cute will happen.' IT AIN'T GONNA HAPPEN!!!!! (We are still seeing some of the same emails that we waited on 10 years ago!)

2. I don't let the bad luck ones scare me either, they get trashed. Or why not change it to "All your chickens will turn
into Emus and kick your outhouse down". It's your message; change it.

3. Before you forward an 'Amber Alert', or a 'Virus Alert', or some of the other emails floating around nowadays, check them out before you forward them. Most of them are junk mail that's been circling the net for YEARS! Just about everything you receive in an email that is in question can be checked out a Snopes. Just go to www.snopes.com (http://www.snopes.com/) . It's really easy to find out if it's real or not. If it's not, please don't pass it on.

So please, in the future, let's stop the junk mail and the viruses.

Finally, here's an idea!!! Let's send this to everyone we know (but strip my address off first, please). This is something that SHOULD be forwarded, so do it.

Thanks

This is a commercial satellite based civilian APRS (location system) and
covers Au. India misses out.
Worth a look, pros and cons - they obviously use geostationary sats.
VK4UN certainly managed fine with HF and I suspect he was being watched
by more people than this system offers.
Interesting auto emergency signalling

228. - - Central Highlands AGM Results - -

Yahoo group: charc
Date: 2008-09-23 23:01:07 UTC
From: Mark Robinson
Topic: 228 Message: 228

The Central Highlands Amateur Radio Club AGM Weekend for 2008 has been and gone with everyone attending proclaiming the weekend to be an outstanding success!

Held during the weekend of September 20th and 21st, hams and their support crews from far and wide made a beeline for Camp Fairbairn near Emerald QLD to meet up with old acquaintances, make new ones and support the small yet mighty Central Highlands Amateur Radio Club in its once a year fund raising event.

Most who attended arrived by Saturday afternoon in near perfect weather conditions and claimed their bunk and eating place for the night. They met up with the very keen ones who had arrived on Friday evening and claimed the best of the spots!

As the sun went down the chin-wagging and rag-chewing increased in rate and were only silenced a bit during the fantastic CHARC BBQ with the CHARC Ladies team wielding mean tongs and spatulas to turn out gourmet food at a fast rate. The Og on the hotplate went ok too and didn't spoil the high quality meaty products supplied by Springsure Butchers. Those who had room were also able to partake in palate pleasing deserts.

The Annual General Meeting was a relaxed affair but plenty of work got done quickly. President Mark VK4KMR chaired the meeting and firstly called for a minutes silence in respect for those hams in the region who had passed away during the year. Respect was given to

Wally Douglas VK4AIV from Marian
Gus Angus VK4NRA from Calen
Don Blanch VK4ZFB from Biloela

Mark then gave a report on CHARC activities during 2008, informing about the improvements and expansions made to the Central Highlands repeater and APRS network. Highlights included linking to Rockhampton and Sarina Repeaters along with the Midge Point APRS Digipeater established and working well.
Some club members were also singled out for special mention with Steve VK4SMW, Roy VK4YRO and Tony VK4HOG being congratulated for providing technical support beyond the call, and Gordon Loveday VK4KAL and Dorothy Loveday being elected Life Members of CHARC for the years of secretarial and treasury duties they have performed for the club.
Mark also thanked all those members who did not actually live in the Central Highlands for their ongoing support and participation in keeping a mighty little club alive.

Mark then declared all positions on committee vacant. Another lifer, Geoff VK4GI, was called upon to conduct the election of the 2009 Committee, with the results being

President Steve Wood VK4SMW
Tresurer/Secretary Gordon Loveday VK4AGZ and Dorothy Loveday
Vice President Mark Robinson VK4KMR
Committee Member Ron Moore VK4YRO
Committee Member Harry Cox VK4LE
Committee Member Robert Waegele VK4TWR
Publicity Officer Helen Wood
Technical Officer Steve Wood VK4SMW

The popular Raffles were then drawn by the new President Steve with the following results
GME TX630 Handheld - Roy Moore VK4YRO
Probe Multimeter - Chris Comollattie VK4VKR
A thing worth more than $7.50 in a brown paper parcel - Dave Wilson VK4UN

Steve thanked Mary VK4PZ and Helen Wood for being the ticket ladies and also thanked Samuel Robinson and Michelle Waegele for the good scrunching job they did to the tickets.

The Monster Auction then proceeded with Bill VK4XZ enticing the crowd to pay up for some real monster pieces of equipment whilst Gavin VK4ZZ acted as auction scribe and Samuel Robinson, Michelle Waegele and a few others in the crowd acted as bid spotters. A note to anyone else thinking of organising a monster auction - the artefacts of food made by the Ladies Group fetched as much as the monster equipment did, with big jars of Anzac Bikkies (which seemed to be a favourite of Clive VK4ACC) Oatmeal cookies, lucky dips and slabs of home-made fruit cake.

With the show finished and many of the group having travelled long distances during the day, personal powercells were rapidly dwindling so the throng made it a night and went off to count stars, sheep or integrated circuits.

Sunday was wake-up time to the lovely aromas of the Recovery Breakfast! The Dynamic Duo - Gavin VK4ZZ and Clive VK4ACC suitably supervised by the CHARC Ladies and master cook Frank VK4CAU - whipped up oodles of mouth-watering edibles which ensured quick business and clean plates. Tidying, sweeping, packing and farewells soon followed and the group wended their individual ways either homeward or onward to other spots to visit.

Here is a list of those who attended and got their name into the book... some might have escaped the net...

VK4KAL Gordon and Dot Loveday from Rubyvale
VK4XZ Bill and VK4HER Dawn Sebbens from Maleny
VK4JM Rusty and VK4JJ Joselyn McGrath from Bundaberg
VK4PZ Mary and VK4GM Gordon Adams from Rockhampton
VK4SMW Steven and Helen Wood from Blackwater

VK4DV Merv Deakin from Rockhampton
VK4JIN Ian Norman from Howard
VK4ZZ Gavin Reibelt from Townsville
VK4VRO Bruce Crooks from Gracemere
VK4FNQ John Goldfinch from Majestic Towers
VK4UN David and Sylvia Wilson from Tewantin
VK4QB Brian and Doreen Bannister from Rubyvale
VK4YRO Roy Moore from Sarina
VK4KMR Mark and Samuel Robinson from Dysart
VK4HOG Tony Tomlinson from Sarina
VK4OG Mick Tomlinson from Mount Mee
YD9BYB Yenni Bonney from Gladstone and Bali
VK4GI Geoff Bonney from Gladstone and Bali
VK4VKR Chris Comollattie from Rockhampton
VK4LE Harry Cox from Springsure
VK4VU Dave and Carolyn Jones from Rubyvale
VK4NPF Bruce and Barbara Lenahan from Mackay
VK4TWR Rob and Tracey and Michelle Waegele from Gladstone
VK4CAU Frank Sleep from Marlborough
VK4ACC Clive Sait from Rockhampton
VK4UD Bob Wright from Bundaberg
VK4XPX Will Scott and BT Pollard from Brisbane
VK3BWP Bernie and Marianne from Melbourne
VK4YLW Leigh Wilson from Rockhampton

If you are not in this list, then you missed out on a fantastic weekend!

(Gavin/VK4ZZ)

Hi All,
Just wanted to let you know, I purchased a small property called "Moongalba" overlooking the township of Marburg in SE Queensland earlier this year, now the time has come for the big move from Dysart.

Samuel and I are moving down there in December with all our "treasures" too set up our new home. I have been working down that way on and off over the last 18 months and found this place and have decided to make a move, a change in lifestyle as we say and it will be a great place where I can set up my radio equipment and we can play with out buggies and go-carts. Samuel is looking forward to growing a veggy plot and gather some fresh eggs from the chocks, got to be free range of course and grow a variety of fruit trees. We also hope to run a few head of cattle as well.

We look forward to having you visit, drop in while down this way, or stay a few day whenever you can. The homestead is only 2 Km off the Warrego Highway west of Marburg and approx 30 minutes into Brisbane City or Toowoomba, a very easy place to find. I'm still waiting to hear on the new phone numbers, email and mobile will remain the same.

This has been around for a while & maybe you need a reminder.

-------- Original Message --------

This has just been brought to my attention; you may not be concerned
but if you value your privacy then it has just been eroded a little
further...

73 and HNY all.

Yahoo is Tracking Group Members

If you belong to ANY Yahoo Groups - be aware that Yahoo is now using
"Web Beacons" to track every Yahoo Group user. It's similar to
cookies, but allows Yahoo to record every website and every group you
visit, even when you're not connected to Yahoo. Look at their updated
privacy statement at http://info.yahoo.com/privacy/us/yahoo/details.html

About half-way down the page, in the section on *cookies*, you will
seea link that says *WEB BEACONS*.

Click on the phrase "Web Beacons." On the page that opens, on the left
find a box entitled "Opt-Out."

In that section find "opt-out of interest-matched advertising" link
that will let you "opt-out" of their snooping. Click it and then
on the next page look for "network advertising initiative" click,
& then go to the opt-out button on the next page.

Note that Yahoo's invasion of your privacy - and your ability to
opt-out of it - is not user-specific. It is MACHINE specific. That
means you will have to opt-out on every computer (and browser) you use.

Please forward this to your other groups. You might complain, too, but
I'm not sure if anyone is listening. I remember when they signed all
users up to get spam and we had to opt out of that a few years ago.

Subject: Echolink on CHARC System

Hi Everyone
For those of you that use echolink Myself and Rob Vk4HW have just finished installing it on the server.
The node number here is 6037 for IRLP and 457011 for Echolink.

I would not recomend connecting to confrences or reflectors due to our sites bieng solar powered ,also we currently have a tail on the repeater .

Talking to individual stations and repeaters shouldnt be a problem.

To gain access to echolink the # key needs to be used before the echolink node you want to connect to ie
to connect to vk4rsa in Sarina the code is #360460 to disconnect use 73
to connect to irlp you just need the 4 digit node number you want to conect to. To Disconect use 73 also.

Give it a try and let me know how you go with it.

Subject: New bushfire warning system includes catastrophic category

Minister for Police, Corrective Services and Emergency Services
The Honourable Neil Roberts
17/09/2009

New bushfire warning system includes catastrophic category

The Bligh Government will implement a new national bushfire warning system that includes a new category of "catastrophic" for the worst fires.

Emergency Services Minister Neil Roberts said the new system was a result of the interim findings of the Victorian Bushfires Royal Commission.

"We have been working with other states and will adopt this new rating system from October 1," Mr Roberts said.

"At present Queensland's fire danger rating system lists the danger as low, moderate, high, very high, and extreme.

"The new system will add two additional categories - severe and catastrophic.

"Fire danger will now be rated as *low-moderate, high, very high, severe, extreme, and catastrophic*."

Mr Roberts said Queensland will also introduce a new fire safety campaign 'Prepare, Act, Survive' for the 2010/11 bushfire season to support the new fire rating system.

"Prepare, Act, Survive will replace the Prepare, Stay and Defend or Go E arly policy and is also being adopted by other jurisdictions," he said.

"Unlike other states, Queensland's bushfire season has already commenced and releasing the new Prepare, Act, Survive message could confuse communities living in bushfire prone areas.

"We will begin updating our signs and community education material and this should be completed in time for Queensland's next fire season which usually commences around July/August in the north of the state and runs through to January/February in the south."

Queensland Fire and Rescue Commissioner Lee Johnson said unlike other states, there has been no bushfire in Queensland, since the Fire Danger Index was introduced in 1966, which would qualify as catastrophic.

"Our worst bushfires in more than 40 years have been Beerburrum in 1994 and Lockyer in 2004, both of which would rate as extreme under the new system," Commissioner Johnson said.

"However, we must be prepared for any possibility - including a catastrophic bushfire.

"On extreme or catastrophic fire days, where there is an active fire posing a high level of risk to life, the Standard Emergency Warning Signal (SEWS) will be used with other emergency warnings.

"This is the siren sound that Queenslanders are already familiar with because it is used with cyclone warnings on radio and television broadcasts."

Mr Roberts said the new Prepare, Act and Survive policy includes a greater emphasis on early preparation, acting early and highlights that the absolute priority is to save lives, not property.

"It highlights the dangers of staying to defend properties by people who may not appreciate what they are likely to encounter, both physically and mentally," he said.

"Under the extreme and catastrophic categories the clear message will be that leaving the area is the safest option as fires will be uncontrollable, with the expectation there will be fatalities, the destru ction of homes and businesses, and whole communities affected.

"In these circumstances even well prepared, well constructed and defended homes may not be safe."

Mr Roberts said the new fire danger rating will also be used as a trigger for the level of advice and messaging to the community when a fire starts. There will be three types of alert messages: Advice, Watch & Act, and Emergency Warnings.

Advice messages will keep people informed and up to date with developments on a fire.
Watch and act messages will advise people to take action to prepare and protect themselves.
Emergency Warnings, accompanied by the siren sound (SEWS), will be activated to advise that you must take action immediately, you will be impacted by the fire.

"While Queensland had a different bushfire risk profile to Victoria, government and the community needed to remain vigilant to the risk posed by bushfires," Mr Roberts said.

"Que ensland Fire and Rescue has closely monitored the Commission since it began its work and examined the issues as they arose.

"At the same time QFRS reviewed its readiness for this year's bushfire season and I believe we are well equipped for the conditions we expect.

"Across the State QFRS has worked hard with public and private landowners to address fire risks, with work undertaken every day to reduce hazards.

"I urge the Queensland community to work with QFRS on these measures and be mindful of their own activities in coming months," Mr Roberts said.

355. Central Highlands ARC AGM report !

Yahoo group: charc
Date: 2009-10-15 23:01:45 UTC
From: mark_vk4kmr
Topic: 355 Message: 355

News from Central Queensland
- Central Highlands ARC AGM report !

The Central Highlands Amateur Radio Club AGM Weekend
was held, well, last weekend !
Many hams and support crews turned up from as far north as
Townsville, from as far south as Maleny and some took the long
way via Birdsville to partake in yet another great ham gathering.
Quite a few took part in the Saturday Lunch Sausage Sizzle
with this new event well supported.
Saturday evening rocked around and after a superb BBQ feast
put on by CHARC the serious part, the Annual General Meeting
took place.
Chairman Steve VK4SMW invited TARC Vice President Gavin VK4ZZ
to make a special presentation - The Ken Robertson VK4KT Memorial
Award for Excellence in Amateur Radio to Roy Moore VK4RM
(the award was announced at the North Queensland Amateur Radio
Convention). Roy in turn dedicated the winning of the award to many
hams who have helped him out during the years with repeater
establishment and maintenance issues.
After the Minutes from the previous AGM and Treasurers Report
were read and accepted, Chairman Steve declared all positions
vacant and handed the meeting over to WIA-QAC Chairman Don VK4BY
to conduct the election of office bearers for 2010. The results are -
President - Steve Wood VK4SMW
Vice President - Rob Waegele VK4TW
Secretary - Gordon Loveday VK4KAL
Treasurer - Dot Loveday
Technical Officer - Steve Wood VK4SMW
Publicity Officer - Helen Wood
Committee Member - Harry Cox VK4LE
Committee Member - Roy Moore VK4RM
Committee Member - Bill Horner VK4FW
The meeting applauded Don for the smooth running of the election,
then Chairman Steve informed the meeting about some
of the things the Club was involved with during the year, including -
- improvements to Springsure repeater site and agreement with local council
- refurbishment of the Hodgsons Range repeater site
- WIA assessment activity
- welcoming two new members into the club
- awarding thanks certificates to key helpers
With the meeting completed it was time to draw the raffles !
- Lucky Door Prize, a $50-00 Fuel voucher donated by Shell,
won by Mark VK4KMR
- Hamper First Prize, a lovely travel hamper donated by Helen Wood,

won by Lyndall VK4ZM
- Hamper Second Prize, a bottle of lovely wine donated by Roy VK4RM,
won by Michael VK4SED
- Hamper Third Prize, a bottle of lovely wine donated by Roy VK4RM,
won by Roy VK4RM (it was lovely so he kept it !)
- Radio First Prize, a Wouxun KG-UVD1 Dual Band Handheld donated by Mal VK4ML,
won by Lyndall VK4ZM
- Radio Second Prize, a LDG 1:1 Balun donated by Jack VK4JRC,
won by Rob VK4TW
- Radio Third Prize, a bottle of lovely wine donated by Roy VK4RM,
won by John VK4FNQ with ticket drawn by Dave VK4UN
- Radio Fourth Prize, a bottle of lovely wine donated by Roy VK4RM,
won by Dave VK4UN with ticket drawn by John VK4FNQ

- then it was Monster Auction Time.
Roy VK4RM was the Auctioneer of Renown,
Bill VK4FW was the Scribe of Doom,
Clive VK4ACC and Steve VK4SMW were the Barrel Girls of Despair.
The Monster Auction consisted of technical treasures, some really
yummy home cooked thingies donated by Helen Wood and some
mysteriously wrapped items donated by various people.
The little morse keys were popular, as were the antennae, the lifetime
supply of microphones and curly cords. The home cooked produce
was extremely popular and we don't know yet if the two US Army
Meals Ready to Eat from the mystery section have yet been deployed.

With the Monster Auction ended the group talked into the late evening,
some remarking on how blustery the wind was getting (take 2 of the dust storms)
with the latest to bed by 1am.
The Sunday Morning Recovery Breakfast was heartily attended by the throng
with appetites quenched and ready for the long trips back home.

Many thanks to those involved with the procuring and cooking,
Gordon VK4KAL and Dot, Steve VK4SMW and Helen, Dawn VK4HER,
and everyone else who pitched in.
A great weekend - if you are looking to enjoy yourselves and also help
support a little club doing a great big job then make sure you get along
to the Central Highlands AGM in 2010 !

(Gavin VK4ZZ)

I am sending this to you to inform all your club members of this terrific offer.

I have attched 3 seperate files of samples of the finished article.
I require the following :

1. a quality jpeg colour photo for the front
2. details of ur name, address, cq, itu etc
3. a $100 security deposit

U get 2000 cards like the attached files for a cost of $135 plus postage.
This is a considerable saving to all.

Please contact me on 0428877551 or vk4fw@westnet.com.au

regards

Hi,
Following on from this text/paragraph below --

- Emergency Communications Operator Training
The Wireless Institute of Australia is currently seeking expressions of
interest from those hams interested in obtaining nationally recognised
accreditation for Emergency Communications Operations and being involved
with the training framework being offered by the WIA.
To register your interest, surf to the WIA Website
http://www.wia.org.au
select the Members tab, then the Emergency Communications link,
then the Register Your Interest link. Fill in the online form as complete
as you can and join the increasing numbers of hams willing to help
their communities with nationally recognised EmCom credentials.

I received the following --
(So, if you are _interested_ & _didn't_ get an acknowledgement , then
`go-register').
Bill vk4xz@...

-------- Original Message --------
Subject: Registration Acknowledgement
Date: Mon, 18 Jan 2010 09:54:24 +1100
From: WIA National Office <nationaloffice@...>
To: undisclosed-recipients:;

Dear Registrants

Thank you for your expression of interest in the Emergency
Communications Operator training being offered by the Wireless Institute
of Australia.

The Wireless Institute has developed the concept, in conjunction with
the WIA Recognised Training Organisation (RTO) and has identified the
competencies at Certificate II in Public Safety as the best fit for the
activities undertaken by emergency communications operators.

The program delivery resources have been developed, and a pilot program
has been completed with 13 licensed amateurs and one non-licensed
person. The pilot program allowed the program resource material to be
streamlined and any issues with the program corrected.

Expressions of interest were called for from persons who were seeking to
be trainers for the program on behalf of the WIA RTO. These persons will
be trained in March and will then proceed to provide training in each
State and Territory. The trainers must hold a Certificate IV in Training

and Assessment TAA40104 or equivalent and be prepared to deliver the training to the standard specified in the training package and as required by the WIA RTO. Immediately after the trainer training, training of those who expressed interest will commence.

Our next step was to call for expressions of interest from the general amateur population. We have received well over 150 expressions of interest and are currently sorting these so that the training sessions can commence as soon as possible.

Among the expressions of interest we have received there is a wide range of qualifications and experience. Some that have applied hold the Certificate IV in Training and Assessment and should they wish to be trained as trainers a training program will be provided.

The process from now will be as follows:

1. Acknowledge all expressions of interest received.

2. Allocate each person to a trainer who will arrange for training programs to be delivered locally. This training will be face to face and will not commence until about the end of March.

3. Provide on line registration for each person so that they have access to the training resource material and updates as they become available

4. The trainers who will deliver the training will advise the RTO and certification will be issued when the person is assessed as competent.

5. Provide a list on the WIA web site of trained Emergency Communications Operators.

After the initial training sessions, individuals who express interest will be able to access the training ?on line?

When the Emergency Communications Operator training has been implemented, competencies relating to ?field operations? will be identified and further training will be offered.

Again thank you for your interest.

417. Interesting Site

Yahoo group: charc
Date: 2010-02-12 00:56:06 UTC
From: Bill Sebbens
Topic: 417 Message: 417

Hi
For those who read/listen to the WIA News, you will see this article.
For others - this site is a great demo of radio waves.
Suggest you send it to all your nephews, cousins, young friends etc. - I
am doing so.
Bill

Seeing radio waves with a light bulb

In an article from "Make" magazine, Diana Eng, KC2UHB demonstrates how, by
using a low power amateur radio transmitter and a simple light bulb receiver
circuit, we see how radio waves and electromagnetic induction transmit energy
and signals wirelessly through the air.

We also see how dipole and Yagi antennas radiate their energy in different
patterns

Now visit the Make website and see how to build your own dipole receiving
antenna!

Hi
Some time ago I put a list of those who have VoIP telephones.

Please check the list & provide any updates.

I shall send back to each of you the updates.

The listing will also be saved in the Clubs yahoogroup Files section.

And don't forget to use the numbers - it could save you money
(ie. on the MyNetFone, calls to others are `/free/'.
I presume the others ones are the same.)

A great demo.B.

-------- Original Message --------

Subject: Kitchen Fire - Read first then watch.... important to know

Kitchen Fire - Read this first, then watch the attached video...

Don’t assume that everyone knows this stuff. Just forward it to everyone you know and maybe they will forward it to some one who doesn’t.

I never realized that a wet dishcloth can be a one size fits all lid to cover a fire in a pan! This is a dramatic video (30-second, very short) about how to deal with a common kitchen fire... Oil in a frying pan Read the following Introduction, then watch the show... It's a real eye-opener! At the Fire Fighting Training school they would demonstrate this with a deep fat fryer set on the fire field. An instructor would don a fire suit and using an 8 oz cup at the end of a 10 foot pole toss water onto the grease fire. The results got the attention of the students. The water, being heavier than oil, sinks to the bottom where it instantly becomes superheated. The explosive force of the steam blows the burning oil up and out. On the open field, it became a thirty foot high fireball that resembled a nuclear blast. Inside the confines of a kitchen, the fire ball hits the ceiling and fills the entire room. Also, do not throw sugar or flour on a grease fire. One cup of either creates the explosive force of two sticks of dynamite. This is a powerful message. Watch the video and don't forget what you see. Tell your whole family about this video. Or better yet, send this to them.

436. expenses

From: Bill Horner
Topic: 436 Message: 436

I am resorting to sending this email to the group because frankly I am concerned that unless we make some changes within the club we will loose valuable persons.

With all the wet weather we have had there have been problems with repeaters going down and not working. Recently Steve has had to do many many miles just too get to all them and resurect same all the while costing him money.

Whilst I am on committee (frankly I feel it is a waste of time) I live many miles from where all the work has to take place as do many other members. Hence most of the work that needs to be done is left to just a couple of persons.......

I believe that perhaps we may need to look at updating some equipment on some of these sites to assist the failure rate of equipment so I propose the following:

1. As we have some good funds in the bank we make sure that whatever equipment is required is ordered post haste.
2. That Steve be reimbursed out of pocket expenses such as fuel and meals at the very least for the time he has had to spend .

I could put a couple of more points down but right now these are the most important.

I would expect to see some input from members on the above.

From: Dave VK4VU
Topic: 436 Message: 437

I would like to respond to Bill's email to the group.

The area covered by the repeaters in question, ie the Central Highlands, is sparsely populated with Amateurs meaning that there are even less Amateurs with the ability and available time to assist Steve at Blackwater and Roy at Sarina with the great job they are doing for the Amateurs in the Central Queensland area. Steve I know has family and job commitments and I'm sure that Roy is in a similar position. On the other hand I no longer have those commitments as my family are well and truly grown up and I am able to arrange what work I have at the gemfields around anything that I would like to do so I am to assist Steve with any repairs and maintenance required particularly at the Hodgson Range, Springsure and Blackdown tablelands repeaters. Ocean View I feel is a little out of my range.

Not only do I have the time available but I also feel I am qualified to help out as I have had 30 years experiance as a technician, Field engineer and Product support in the two way radio trade. 27 of those years were with Tait Electronics both here in Australia and also in ZL. I see from photos that there is a predominance of Tait equipment used at the CHARC sites so I am already familiar with the equipment in use.

With regards to the purchase of new equipment only Steve and Roy will know needs to be replaced so they should be the ones to make the ultimate decision and recommendations to the members before any money is spent.

Also certainly both Roy and Steve should be reimbursed for any out of pocket expenses incurred while carrying out repairs and maintenance of our repeater system.

Best 73's to all

I would like to make an announcement My wife Helen and I are expecting our first baby in October. We are looking forward to this but am not sure if Helen can make the AGM.
Helen and I have been away for two weeks and are now back in Blackwater.
I am currently not on hf at home but i will endevor to get my antenna back up soon.
I have a new vechile and will be putting my ic706 radio in it over the weekend with the new terlin antenna to arrive in the next week.

At present I am building a new S/H Tait Repeater for Springsure Repeater site,Sprinsure repeater is back on line at reduced power output at present.

We have ordered some new antennas for Repeater sites the expected date is 1st of May these are for various sites.
I am going to Blackdown on Sunday to retune the diplexer and check the repeater operation also i will be fitting ctcss to the 2 meter tx to resolve a possible ploblem at mount Archer on rx.
Regards.

451. Hodson Range repairs

Yahoo group: charc
Date: 2010-05-16 08:35:23 UTC
From: Steven Wood
Topic: 451 Message: 451

Hello everybody
I have recently ordered several antennas and have planned to organise a trip to Hodson range on the 5th of June 2010 some people are going up on Friday Evening so we can get an early start on the Sat morning.

The equipment been taken up is
2* 3db vertical antennas
clamps
alluminiun cross arm to mount antennas on
coax cable,connectors
Tools ect.

The main reason for this trip is to install a crossarm to the tower that will allow for the mounting of two verticals,1 side mount dipole and yagi antenna. The origanal antennas are swaying in the breeze and brackets have coroded.

The following people are coming at this stage.
Roy Vk4RM
Tony Vk4HOG
Damien Vk4LDA
Steven Vk4SMW

Helen will organise Sat lunch and Roy will have his BBQ there for Dinner.
If you require further info on the trip contact Steven on 49827459 AH Or Roy Vk4RM.

We will be camping at the base of the hill.

454. New WICEN 70 Repeater

Yahoo group: charc
Date: 2010-05-18 22:01:14 UTC
From: Bill Sebbens
Topic: 454 Message: 454

If you are going to open a repeater, do it with a splash.

People from Harvey Bay are accessing it - probable over water path.
Should be accessible from other parts when ducting is around.

-------- Original Message --------

A technical description of the Entabulator.

Several years ago, Rockwell International decided to get into the
heavy duty transmission business.

We were getting ready to tape our first introduction video.

As a warm up, the professional narrator began what has become a legend
within the trucking industry.

This man should have won an academy award for his stella performance.

Now remember this is strictly off the cuff, nothing is written down.

I think you will enjoy this once in a lifetime performance from this
gentleman.

I would like to thank all that assisted at the repeater site.
The repeater is now Transmitting on two new Antennas and Has Increased the antenna gain to 3dbd on vhf this has improved coverage and can be keyed mobile on the outskirts of Blackwater. The uhf has had the coax replaced and is working well.

The solar reg has been changed also and has eliminated the buzzing sound it had previously.

The aprs antenna has been changed as the original had water in it.

Again thanks to all that assisted

Hi,
I sent an email some time ago, but some have told me that the site
closed & they were not able to download.
I just checked & was able to download & save.

http://phonetic.f-snet.com/622d.pdf

If you are unable to receive it, then I have a saved copy
& can send it to you.
I don't think that I can put it in the Yahoo file as I
think they have a 1 meg limit ???? it is 4.7 meg.

Maybe we should make this the standard text for entry to
the Wicen Group ?!

73 de Bill vk4xz

Hi,
Found this Field Antenna Handbook of the US Marine Corps.
It has some good diagrams & text in it.
Other bits, I just say `Ogh'.

Just think, if you read & absorb, you will know how to fix a broken antenna.
AND you will be as smart as a US Marine Corp Operator !!

Hi

There are a total of 28 files to download, one for each chapter of the book. The total download is 93.5MB. The files are numbered 00 to 27 so you start with 00.pdf and then increment the number by 1 until you have downloaded all 28 files. You need to put them all in a folder then you can open 00.pdf and access all the chapters from that file.

cheers and good luck
Dave

484. Fwd: [QLDRFS] Road rules challenge

Yahoo group: charc
Date: 2010-08-11 23:40:36 UTC
From: Bill Sebbens
Topic: 484 Message: 484

It's amazing the vehicles that do NOT indicate correctly on roundabouts.
Do You Know?

To find the Quiz, - easy way is to put "Quiz" in the search box.
(and I 'ain't gunna tell you my score)

Bill

-------- Original Message --------
Subject: [QLDRFS] Road rules challenge

How well do you know the road rules? We all knew them perfectly when we first got our driver licence, but do you still know them as well now? Are you aware that some have changed over the years?

These are the questions being asked in the latest road safety campaign in the /Be street smart/, road rule refresher campaign.

This campaign is a real eye opener in identifying gaps in your road rules knowledge as it tests and clarifies knowledge of the top ten most commonly confused road rules:

1. Merging

2. Changing lanes

3. Roundabouts

4. Safe following distances

5. Crossing continuous centre lines

6. Giving way

7. Keeping left

8. Yellow traffic lights

9. U-turns

10. Overtaking.

You may be surprised at how many rules you may misunderstand, or you may be stunned at how greatly not following the road rules contributes to the road toll.

One in six fatal crashes, and 50 fatalities last year resulted from drivers breaking the rules:

* illegal manoeuvres contributed to 57 fatalities
* failing to give way or stop contributed to 21 fatalities
* disobeying a traffic light/sign contributed to 6 fatalities.

Not accurately knowing and following the rules is a serious problem.

Try the quiz at www.hereforlife.qld.gov.au <http://www.hereforlife.qld.gov.au> to see how well you really know the rules and brush up on your knowledge. It is only ten questions so doesn't take too long, and is really quite fun... and surprising!

Please take the time to test your road smarts and help spread the word by challenging friends and family to take the test and see who knows the rules the best!

Then view the fantastic new animated videos also online that demonstrate the rules in action.

There's also a new road rule refresher pocket guide that clarifies the top 10 misunderstood rules with quick and simple text and diagrams. Make sure you know the rules. Be street smart and visit hereforlife.qld.gov.au to take the test and brush up on the rules.

487. Repeater upgrade at Springsure

Yahoo group: charc
Date: 2010-08-18 14:42:00 UTC
From: Steven Wood
Topic: 487 Message: 487

Good morning
Last weekend Harry vk4le and myself swapped out Repeaters at Springsure the vhf repeater on 146.825mhz is now running a Tait T800 50 watt repeater it is out putting a ctcss tone of 123.0hz should you be getting any local interference,no ctcss is required to access it .
I am able to work this repeater in Blackwater almost 100km from springsure in the mobile while a little weak.
I will post a photo on to the site when time permits.

We are also going to Vk4rhr repeater site to find the power fault on the 10th 11th 12th we will be hiking at sunrise on SAT 11th and camping overnight sat,at this stage no major items are going up so small back packs and water are required.

People hiking at the moment
Dave vk4Vu
Tony Vk4hog
Steven Vk4smw

some others not comfirmed.

Thanks

I am not much of a data Guru when it comes to radio's, but I would like some guidance in getting this setup correctly, in a couple of weeks I will relocate the iGate to the Blackwater SES HQ, as well as the Automated WEFAX receiver and Weather Monitoring station. For now I will setup the system at my home QTH.

VK4SMW, Can I suggest a UHF or VHF "township" repeater for emergency use be fitted out @ the SES location?

Dawn Sebbens

Early on Sunday morning, the 9^th of January 2011, Dawn passed on to the next life.

There will be a Service to celebrate Dawn's life at 11am this Friday 14th, at the Maleny Baptist Church.

Following this will be a brief meeting at Witta Cemetery, for those who wish to attend, and then move on to the Maleny RSL Club.

The Wake will be at the Maleny RSL Club after the service for light refreshments, to spend time with Bill, the family and each other.
Those who don't wish to go to the cemetery may go straight there and the others won't be far behind.

Flowers:
Dawn requested that donations be given to her `Friends of Ebenezer' work, in lieu of flowers.
Envelopes will be available at the service.

Addresses:
Maleny Baptist Church - Corner Macarthy & Landsborough Roads
Maleny RSL Club - Bunya Street, at the Obi Obi Creek Bridge

Please feel free to pass on this information to anyone who may be interested.

Sincerely, Bill

Forever With The Lord

From: Mark
Topic: 524 Message: 532

Hi all,
I think I remember the last time you where up that tower Steve you cooked, always the wrong time of the year. Good to hear there all linked together again.
Dave VK4VU the Middlemount site is not a separate repeater, it is the linking site that links all the VHF sites via the new UHF 70cm split link frequencies that are 20MHz apart. For many years it was linked there on VHF now to meet present changes with linking repeaters the ACMA we had to change it over some time back. Steve & Roy have replaced the antenna as they were originally a number of yagi's back to back there.
I hope this might clear it up

Hi Roy,
It is obvious that some vermin has highjacked your address.

The simple solution is for you to log into the CHARC server as a new user
with your current callsign.
Once you have done that, I shall delete your old one.

From: vk4zz
Topic: 553 Message: 553

Sad news to reach the news desk
that Frank Sleep VK4CAU has gone Silent Key.
Frank passed away in Maryborough QLD Hospital following a massive heart attack.

Frank was one of the founding members of the CMCA HF Radio Club
and was one of the technical stalwarts behind the success of the
Selective Call project. Frank was also a beta-tester for the new range
of Barrett HF radio equipment now hitting the market.

Frank was also a pioneer of APRS and Packet Radio in Australia.

Frank was always available to help anyone out with a technical problem,
helping them to find the answers in a kind and supporting way.

No funeral details yet - however I am sure that everyone who knew him
will pass their sincere condolences to XYL Hazel during this sad time.

Thanks to Hazel and Joan VK4FTVL for alerting the news desk.
We have lost a good bloke.

Gavin VK4ZZ

Yahoo group: charc
Date: 2011-04-19 10:11:02 UTC
From: Steven Wood
Topic: 563 Message: 563

Hi everyone
Last weekend Several people Attended Hodson range for some camping and repeater repairs. people including vk4 fliz Liz,Vk4Hog Tony,Vk4Rm Roy,Vk4Vu Dave , Steve Vk4 Mit and myself Vk4Smw.
After the Climb about 1 hr 40 mins we reached the top there was shouts of happiness when Tony checked the batteries and found them to be fully charged.
After some discussion the solar regulator was changed wiring and terminal blocks fitted,and an external low voltage cut out device seperate to the Solar regulator wired in place and we were back on Air.

Thanks to Everyone and also to Liz and Tony for catering.

In case you missed it in the news.--

FROM ANDERSSON HOUSE THE WEEKLY WIA DIRECTORS SPOT.

WIA Emergency Communications

Several weeks ago I discussed the WIA's emergency communications training system, and how the $10,000 in seed funding allocated by the WIA Board last year has now resulted in over 100 people being awarded nationally recognised qualifications in emergency communications.

I would now like to tell you about the next step.

The emergency communications scheme was always intended to be a two-part process
- training and accreditation. All voting-WIA members who have completed the training course and who have been assessed as competent will be able to apply
for WIA accreditation as an emergency communications operator.

Accreditation will not be automatic, and only those people who meet certain criteria for availability, health and mobility will be accredited. This is necessary to ensure we provide an effective and useful resource to emergency
services, and we don't want to put members at undue risk.

The WIA intends to promote the emergency communications program to emergency
services and non-government organisations and is currently considering how that
can best be done.

Also the new emergency communications system needs a name, and the name adopted
so far is RAVEN - Radio Amateur Volunteer Emergency Network.

It is considered important that the term Radio Amateur is included in the name,
and we wanted to avoid any confusion with WICEN.

In a few weeks I'll tell you how things are progressing and maybe tell you about
some more initiatives in emergency communications from the WIA.

This is Phil Wait, VK2ASD, for the WIA.

Central Highlands ARC 2011 AGM Results

The Central Highlands Amateur Radio Club AGM Weekend
was held, well, last weekend !
Many hams and support crews turned up from as far north as
Townsville, from as far south as Brisbane to partake in yet another
great ham gathering.
Quite a few took part in the Saturday Lunch Sausage Sizzle
with Steve and the cooking crew catering.
The serious part of the weekend, the Annual General Meeting,
was held from 1701 to 1742 local time.
Apologies were received from John VK4JWG and Mark VK4YM/VK4KMR.
Silent Keys were acknowleged and a minutes silence was held
in respect for Dawn Sebbens, Frank Sleep VK4CAU and Wayne Brice.
After the Minutes from the previous AGM, the Presidents Report,
the Secretary's Report and Treasurers Report
were accepted, Chairman Steve VK4SMW declared all positions
vacant and handed the meeting over to member Gavin VK4ZZ
to conduct the election of office bearers for 2012. The results are -
President - Steve Wood VK4SMW
Vice President - Rob Waegele VK4TW
Secretary - Gordon Loveday VK4KAL
Treasurer - Dot Loveday
Technical Officer - Steve Wood VK4SMW
Publicity Officer - Helen Wood
Committee Member - Roy Moore VK4RM
Committee Member - Tony Tomlinson VK4HOG
Committee Member - Dave Jones VK4VU

At the end of the elections Gavin VK4ZZ, as Vice President of
theTARCinc, presented 2012 CHARC President Steve VK4SMW with
the 2011 Ken Roberston Memorial Award for excellence in
Amateur Radio Experimentation, as announced at the 20th North
Queensland Amateur Radio Convention.

The meeting thanked Gavin for the smooth running of the election and
Steve VK4SMW continued as Meeting Chairman.

The meetings acknowledged with acclaim the Life Member status of
Mel Lees VK4ML
Richie Chappel VK4RR/VK8RR
David Wilson VK4UN
Dot Loveday & Gordon Loveday VK4KAL
Harry Cox VK4LE

Chairman Steve informed the meeting about some
of the things the Club was involved with during the year, including -
- upgrades to Middlemount, Midge Point, Blackdown Tableland and Springsure
sites.
- working bees and fault fixing continuing at the Hodgsons Range repeater site
- some upgrades made at the Middlemount linking site
- IRLP and Echolink nodes now operating from the VK4SMW QTH at Blackwater
- the need for local club members to promote Amateur Radio in the community
- progress on the Gladstone Link project in co-operation with the Gladstone
Amateur Radio Club

Club members voted unanimously for the club to become an incorporated association.

Saturday evening rocked around and after a superb BBQ feast
put on by CHARC the multi-prize Raffle was drawn.

Moneyboard Number 1 was won by Roy VK4RM
Raffle 01 Flash Embroidery Shirt was won by Lyndall VK4ZM
Raffle 02 Babooshka Cup Set was won by Dot Loveday
Raffle 03 Colin's Solar Light was won by Tracey Waegele
Raffle 04 Jim Beam Flag was won by Noel VK4NL
Raffle 05 25 Piece Combination Tool Set was won by Mary VK4PZ
Raffle 06 Bottle of Chiraz was won by Roy VK4RM
Raffle 07 $30 Dick Smith Electronics Gift Voucher was won by George VK4AJL
Raffle 08 Kiwii Rug and Cushion Set was won by Gordon VK4GM
Raffle 09 Cascade Coffee Maker was won by Clive VK4ACC
Raffle 10 Kambrook Food Steamer was won by Tony VK4HOG
Raffle 11 Camping World Camel Back and Microfibre Towel was won by Roy VK4RM
Raffle 12 Jim Beam Flag was won by John VK4FNQ
Raffle 13 Beach Towel was won by Rob VK4HW
Raffle 14 Bottle of Merlot was won by Helen Wood
Raffle 15 Direct Auto Supply collection of Car Goodies was won by John VK4FNQ
Raffle 16 Bob Jane T-Mart Mackay $100 Voucher was won by Rob VK4TW
Raffle 17 Jim Beam Flag was won by George VK4AJL
Raffle 18 Microsoft Explorer Mouse and goodies was won by Gordon VK4GM
Raffle 19 Logitec Keyboard Mouse and Diskies was won by Roy VK4RM
Raffle 20 A Special Bowl was won by Dave VK4VU
Raffle 21 Bottle of Savignon Blanc was won by George VK4AJL
Raffle 22 Beaurepairs Mackay Wheel Balance and Rotation Voucher was won by Roy VK4RM
Raffle 23 Special Computer Keyboard was won by Noel VK4NL
Raffle 24 Computer Microphone was won by Harry VK4LE
Raffle 25 Windows Games was won by Tracey Waegele
Raffle 26 World of Warcraft game was won by Tracey Waegele
Raffle 27 Jack VK4JRC BP $50 Gift Card was won by John VK4FNQ
Raffle 28 Game and Computer Microphone was won by Rob VK4TW
Raffle 29 Jim Beam Flag won by Roy VK4RM
Raffle 30 Wood Family Bonza Soldering Iron won by Rob VK4HW
Raffle 31 Nixons Communications ICOM PS300 Power Supply won by Roy VK4RM

- then it was Monster Auction Time.
Bill VK4XZ was the Auctioneer of Renown,
Rob VK4TW was the Scribe of Doom,

Michelle Waegele was the Assistant of Aclarity
Noel VK4NL was the Spruiker of Angst

This monster auction was an assortment of technology modern and heritage (with Clive VK4ACC scoring a really cheap yet precious historical radio system for the Rockhampton Heritage Museum)
Succulent Produce, Snazzy Apparel and tantilising Mystery Objects.
Thanks to the eager participation by everyone who attended the final result from the auction will go a long way towards funding the licence fees for the extensive repeater network operated by CHARC.
With the Monster Auction ended the group talked into the late evening, swapping hints on ham programs, mobile phone tricks and exchange of digital photos from the weekend.
The Sunday Morning Recovery Breakfast was heartily attended by the throng with appetites quenched and ready for the long trips back home.

Many thanks to those involved with the procuring and cooking,
Gordon VK4KAL and Dot, Steve VK4SMW, Helen Woods, Tracey Waegele, Lyndall VK4ZM, Sylvia Wilson, Jan DesJardins and everyone else who pitched in.

Membership Fees for 2012 are -
Individual Club Membership $20
Couple or Dual Membership $25

A great weekend - if you are looking to enjoy yourselves and also help support a little club doing a great big job then make sure you get along to the Central Highlands AGM in 2012 !

(Gavin VK4ZZ)

**
I thought you would enjoy this reading > CAR RADIO, AN INTERESTING TRUE QUINCY STORY

CAR TUNES

Radios are so much a part of the driving experience, it seems like cars have always had them. But they didn?t. Here?s the story.

SUNDOWN

One evening in 1929 two young men named William Lear and Elmer Wavering drove their girlfriends to a lookout point high above the Mississippi River town of Quincy, Illinois, to watch the sunset. It was a romantic night to be sure, but one of the women observed that it would be even nicer if they could listen to music in the car.

Lear and Wavering liked the idea. Both men had tinkered with radios ? Lear had served as a radio operator in the U. S. Navy during World War I ? and it wasn?t long before they were taking apart a home radio and trying to get it to work in a car. But it wasn?t as easy as it sounds: automobiles have ignition switches, generators, spark plugs, and other electrical equipment that generate noisy static interference, making it nearly impossible to listen to the radio when the engine was running.

SIGNING ON

One by one, Lear and Wavering identified and eliminated each source of electrical interference. When they finally got their radio to work, they took it to a radio convention in Chicago. There they met Paul Galvin, owner of Galvin Manufacturing Corporation. He made a product called a ?battery

eliminator? a device that allowed battery-powered radios to run on household AC current. But as more homes were wired for electricity, more radio manufacturers made AC-powered radios. Galvin needed a new product to manufacture. When he met Lear and Wavering at the radio convention, he found it. He believed that mass-produced, affordable car radios had the potential to become a huge business.

Lear and Wavering set up shop in Galvin?s factory, and when they perfected their first radio, they installed it in his Studebaker. Then Galvin went to a local banker to apply for a loan. Thinking it might sweeten the deal, he had his men install a radio in the banker?s Packard. Good idea, but it didn?t work ? half an hour after the installation, the banker?s Packard caught on fire. (They didn?t get the loan.) Galvin didn?t give up. He drove his Studebaker nearly 800 miles to Atlantic City to show off the radio at the 1930 Radio Manufacturers Association convention. Too broke to afford a booth, he parked the car outside the convention hall and cranked up the radio so that passing conventioneers could hear it. That idea worked ? he got enough orders to put the radio into production.

WHAT?S IN A NAME

That first production model was called the 5T71. Galvin decided he needed to come up with something a little catchier. In those days many companies in the phonograph and radio businesses used the suffix ?ola? for their names ? Radiola, Columbiola, and Victrola were three of the biggest. Galvin decided to do the same thing, and since his radio was intended for use in a motor vehicle, he decided to call it the Motorola.

But even with the name change, the radio still had problems:

When Motorola went on sale in 1930, it cost about $110 uninstalled, at a time when you could buy a brand-new car for $650, and the country was sliding into the Great Depression. (By that measure, a radio for a new car would cost about $3,000 today.) In 1930 it took two men several days to put in a car radio ? the dashboard had to be taken apart so that the receiver and a single speaker could be installed, and the ceiling had to be cut open to install the antenna. These early radios ran on their own batteries, not on the car battery, so holes had to be cut into the floorboard to accommodate them. The installation manual had eight complete diagrams and 28 pages of instructions.

HIT THE ROAD

Selling complicated car radios that cost 20 percent of the price of a brand-new car wouldn?t have been easy in the best of times, let alone during the Great Depression ? Galvin lost money in 1930 and struggled for a couple of years after that. But things picked up in 1933 when Ford began offering Motorola's pre-installed at the factory. In 1934 they got another boost when Galvin struck a deal with B. F. Goodrich tire company to sell and install them in its chain of tire stores. By then the price of the radio, installation included, had dropped to $55. The Motorola car radio was off and running. (The name of the company would be officially changed

from Galvin Manufacturing to ?Motorola? in 1947.) In the meantime, Galvin continued to develop new uses for car radios. In 1936, the same year that it introduced push-button tuning, it also introduced the Motorola Police Cruiser, a standard car radio that was factory preset to a single frequency to pick up police broadcasts. In 1940 he developed with the first handheld two-way radio ? the Handie-Talkie ? for the U. S. Army.

A lot of the communications technologies that we take for granted today were born in Motorola labs in the years that followed World War II. In 1947 they came out with the first television to sell under $200. In 1956 the company introduced the world?s first pager; in 1969 it supplied the radio and television equipment that was used to televise Neil Armstrong?s first steps on the Moon. In 1973 it invented the world?s first handheld cellular phone. Today Motorola is one of the second-largest cell phone manufacturer in the world. And it all started with the car radio.

WHATEVER HAPPENED TO?.

The two men who installed the first radio in Paul Galvin?s car, Elmer Wavering and William Lear, ended up taking very different paths in life. Wavering stayed with Motorola. In the 1950?s he helped change the automobile experience again when he developed the first automotive alternator, replacing inefficient and unreliable generators. The invention lead to such luxuries as power windows, power seats, and, eventually, air-conditioning.

Lear also continued inventing. He holds more than 150 patents. Remember eight-track tape players? Lear invented that. But what he?s really famous for are his contributions to the field of aviation. He invented radio direction finders for planes, aided in the invention of the autopilot, designed the first fully automatic aircraft landing system, and in 1963 introduced his most famous invention of all, the Lear Jet, the world?s first mass-produced, affordable business jet. (Not bad for a guy who dropped out of school after the eighth grade.)

625. Bill's E-Mail addresses

Yahoo group: charc
Date: 2012-01-20 00:07:37 UTC
From: Bill Sebbens
Topic: 625 Message: 625

G'day Everybody,

I have finally got real `pinged-off' with the yahoo
email servers giving me messages of `unable
to send your message' , especially when there
were 20 or more addressees.

Thus I have opened another Gmail account
ie.Billshumour@...
particularly for those who are*prolific* senders of :-

`/Items of Interest' eg geographical,5 kids playing guitars etc.

`Humour items' etc.
/
(Iain, Ian, Geoff, Peter, Paul, Clive, etc
{anyone else: please feel free to use for such items if
they so desire})

So these are my addresses - you don't have to record them all -
just the ones you may use.

(which for 98% of you means only "malenybill@..." -
- or what I am saying is that for you who only send a couple
of `humour items 'per week, then the malenybill one is fine)

---

malenybill@... General stuff
vk4xz@... Radio & Electronics
bill@... Family & Friends mail
Billshumour@... Humour &Interesting Stuff

vk4xzmaleny@... (Don't use) Very seldom look there.
{Please delete this one}

vk4xz4552@... (Don't use) Very seldom look there.
{Please delete this one}

Incidentally, if you have the `internode' address recorded then please
delete that too as I may be changing servers soon.

Re the latter 2 (yahoos) - you may see these from time to time-
but I am treating them as the `throw-away' addresses.
(but don't send to them, as maybe only once a month,
will I go to that site & delete the accumulation)

What that means is that when I write a msg that has multiple
addressees, I place them in the Bcc; (blind carbon copies)
so that everyone's address is NOT broadcast to the world.

BUT, if I leave the To: column blank, then the email that
you receive will say something like "unknown recipient"
which I think is a bit crude.
Yes, I could put the address that I am sending from, but then
that is another one to process when it comes back !
Thus in the To: column I put one of my `throw-away' addresses
& thus the msg that you receive looks much nicer to you, the
recipient, than "unknown recipient".

Why am I doing this - it's called diversification - another
way to say I am trying to prevent my email addresses overflowing
& mail subsequently being rejected/lost. I think that most of
you have experienced such.

Bye from Bill

Yahoo group: charc
Date: 2012-06-11 14:04:51 UTC
From: vk4smw
Topic: 651 Message: 651

hi everyone this weekend saw the completion of the link in to Gladstone. We are trialling this system,the frequency in Gladstone is 439.800mhz. 91.5 ctcss tone. Thanks to Paul for the work he has done at the Gladstone end vk4hn. Steve vk4smw has also installed extra equipment at Blackdown tableland this new link can be turned on/off via dtmf if required. If you know anyone in Gladstone, give them a call and let them know. Cheers Steven Wood vk4smw

hi all for your info .. 4nw

-----Original Message-----
From: Secretary
Sent: Tuesday, June 18, 2013 6:13 PM
To: undisclosed-recipients:
Subject: SEQATV - expressions of interest for ATV equipment

Secretaries,

The SEQATV Group have come up with a few options for potential ATV operators. The Club is very focussed on making it as easy as possible for interested persons to get active on ATV. The following equipment provides a very economical means for operators to get on, if they are interested. If there are any technical queries, please let your members know we are more than happy to help.

1. 10GHz LNB, an excellent German product available for Euro$44. It will work nicely with the 10.43GHz FM output from VK4RKC and will interface without any modification to analogue and digital satellite STB's. If we can get a quantity ordered together the shipping cost can be minimised. The shipping cost for 1 to 8 units is Euro$40, so if get 8 the shipping cost per unit reduces dramatically.

2. Comtec based 23cm FM ATV transmitter. It is proposed to put together a kit of parts for an 18W 23cm FM ATV transmitter based on the Comtec TX module and a RA module. The constructor will have to assemble the PA, mount it their heatsink, supply connectors and enclosure. We believe the kit will be about A$150. VK4RKC has a FM input on 1250MHz.

3. 13cm FM TX and RX modules, we have a quantity for sale. This is the cheapest way to get a TX for ATV FM. TX modules are about $10, RX modules about $30 (available from Jaycar). You will need to solder some electrolytic capacitors and put it in a box. A suitable 0.5W PA is freely available on eBay for US$50. Look out for the technical article in coming Amateur Eye.

If you, or someone you know, is interested in any of these items please get in touch.

Receiving VK4RKC is simple with a cheap digital STB, given it is manually tunable to 446.5MHz. A directional antenna pointed towards Oceanview is essential. Programming is generally on from 7.30pm every

night. National ATV liaison frequency is 147.400MHz simplex, if you need a signal to tune, give a shout out.

I'd very much appreciate if you could circulate this to your members. If you do not wish to receive any notifications from the SEQATV Group please let me know.

Cheers,
Peter - VK4EA
SEQATV Secretary

P.S. we are conducting an OB (outside broadcast) day this Saturday (22nd June). We plan on broadcasting live from hilltops around SEQ from VHF/UHF contest participants. For certain we will have ops at Mt Gravatt and Howell's Knob. Feel free to drop by for a look.

Hi guys .A personal congratulations to your club reaching 25 years .
It shows clubs that members that work and respect each other can survive for years .I hope your club Is around for another 25 years .The Banana Shire Repeater Association has been around for 30 years and now with the joining of the amateur radio club we can be assured of being around for years to come.They survive due to hard work by their members and volunteers .Once again congratulations on reaching 25th hope you have a fantastic time.

Dave

At the AGM it was decided to return to the old time of 20:00 EST and that is the start time for the net as from last Friday.
The email coming from the CHARC group hasn't reflected the correct time for a long time. I have tried to correct it but I don't have the required authority to do that. I enquired at the AGM but no one could tell me who had the admin rights for the group.
At this time I would ignore the email that comes from the group. Neil, VK4MKY, who is our publicity officer sends out an email each Friday re the net. I'll forward todays email to you so you have the up to date info & if you wish to be on the circulation just email a request to Neil - vk4mky@....

Cheers
Dave

From: stevenmwood@...
Topic: 800 Message: 800

Just letting you know that one of our repeaters is back on line after many years.
The frequency has recently been allocated by the acma and it is 146.875mhz ctcss of 91.5hz is required to access it.

This repeater fills in the missing gap between Nebo and Clermont.

A document was found dating back to 1995 on this mountain.

In the future we hope to get the repeater back to its origonal site we are currently down the hill a bit at another location.

Thanks to all that assisted, and yes this repeater is linke to the Central highlands system.

Good Evening everyone,

Just wanted to touch base ans to see if everyone is keen again for camping get together at Theresa Dam over the Queens Birthday Weekend in June.

Also the question has been brought up about the AGM in September at Camp Fairbairn about moving it to another venue. Is everyone happy with what we do or do you have any suggestions for 2015?

Have a safe weekend.

Helen

833. AGM CHANGE OF VENUE

Yahoo group: charc
Date: 2015-09-17 06:03:59 UTC
From: Helen Wood
Topic: 833 Message: 833

I just wanted to let you know that there has been a change with the AGM this year. I know it's late notice and I have only just been told and have been looking at options. As there are a number of members already booked into Lake Maraboon, we decided that was the best option. The other option is if you have a van/tent we can camp at Lake Maraboon just up the road for $39 per night (Dorms were $32/night per couple) obviously things will be done a little differently but the park managers are going to allow the auction at our campsite and we will have a mini raffle. Numbers are down this year compared to previous years so it wasn’t going to be a huge year for fundraising. As for the BBQ on the saturday night we can still do that and all eat together as there are a number of camp kitchens and the facilities to do so. Also Rob vk4tw has been speaking to Bob vk4cwl and he has offered the model aircraft grounds to members to camp free of charge.

We already had 12 people booked into Lake Maraboon (only had 9 booked into the dorms) and there wasn’t any other dates that would suit and I have to go for surgery so we couldn’t change either. I am so sorry for the inconvenience this may cause.

Regards
Helen Wood

836. Electronic Relays - A Hazard !?

Yahoo group: charc
Date: 2015-11-08 02:15:16 UTC
From: Bill Sebbens
Topic: 836 Message: 836
Attachments: 1 described; binary payloads are missing from this source WARC

Hi All,

I needed some relays to switch on a Computer and a Battery Charger.
both 240V AC items. (but note - both have Switched-Mode power supplies)

In my junk box I found 2 Solid State Relays, so I thought `Great, these would be ideal for the purpose' . Thus I duly mounted them in a box - the relay activated by application of 12V DC.

{ Look up 240D25-4 on the internet - see also the attached piccy, but I removed the pcb that was attached when they fell off the back of a truck}

Testing - Yup !, both worked very nicely at switching on and off of a test lamp.
So, installed them to the above items.
Yes, they both obediently switched the above on and off.
Or so I thought - it was then that I noticed that the `On Led' on the Battery Charger was `On' when the relay was `Off'.

Uhm! Out with the multimeter. Output from the relay was 210 volts with no-load and about 19 volts with load. Subsequent discussion with some Club members revealed that these relays have a `Snubber' circuit and the makers are apparently happy with that and say that such voltages are perfectly alright for such as long as the current doesn't exceed a certain number of milliamps. (my memory says it was 17 mA but maybe my memory is not perfect!).

Have a look at -
https://www.opto22.com/documents/0859_Solid_State_Relays_data_sheet.pdf
particularly at the `Snubber' circuit on page 4.
(Do your own research on Snubbers)

Ok, this may be ol'right in an industrial situation. And it may be alright for a resistive load, but to activate a Switched-Mode power supply - I don't believe so.
But for an installation in My Shack, where I am likely to put my little fingers into a device, thinking that it is turned off is a NoNo for me. I have reached a fair age now with only one zap from 240V and don't really want any more: Actually, I don't mind dying of old age or maybe from a surplus of the contents from those bottles with a gold label, but an overdose of electrons - Naw !

I have subsequently gone back to my shed/junk box , found a couple of mechanical relays and installed them in lieu of the above.
QED.

So, if anyone wants to tell this old fellow to get with the electronic age, then go right ahead. I probably won't believe you anyway.

845. Central Highlands ARC AGM Weekend 2016

Yahoo group: charc
Date: 2016-09-10 22:08:33 UTC
From: vk4zz09@...
Topic: 845 Message: 845

- Central Highlands ARC AGM Weekend
The famous and popular Central Highlands Amateur Radio Club AGM weekend
will be happening at Lake Maraboon Holiday Village, approx 25km southwest of Emerald,
from 2pm Friday 23rd to 10am Sunday 25th September 2016.
Some hams and support crews will be staying a bit earlier or later at the fabulous lakeside
venue renown for a great climate, friendly management and buckets o redclaw for the
catching.
The venue is just down the road from the impressive Fairbairn Dam and the local model
aircraft
flight centre.
There will be great chances to catch up with hams and support crews from all over the
country
who attend to get involved the only fundraising activity CHARC has to finance the
licencing,
maintenance and expansion of the Central Highlands Linked Repeater System, analogue,
digital and APRS.
Experience the raffles, gastronomic feed ups (with dessert) and the Mega-Auction held in
the huge
camp kitchen shelter.
Get cracking and get your accommodation booking in now.
Visit www.lakemaraboonholidayvillage.com.au on the interweb
or phone the friendly reception people on 07 49823677
and for catering purposes make sure you let CHARC Secretary Helen/VK4FHEL know you are
attending on
email [qrm] vk4wch [at] outlook [dot] com [dot] au [qrm]
or by sms on 0412038033
(being sure to release the counter-measures first)

This just in from Helen/VK4FHEL -
A FUN weekend catching up with friends and telling stories.
Saturday we have raffle tickets, money board throughout the day.
We will have our MONSTER Auction after Dinner Saturday night so if you have
any junk <oops> i mean quality stuff lol you would like to donate bring it along.
Sausage Sizzle for lunch will be available. BBQ Dinner and BBQ Breakfast on the Sunday.
Cold drinks will also be available to purchase on the day.
If there is something particular you would like please let me know.
If there are any allergies can you please let me know also.

We usually have HAPPY HOUR from about 4pm so if you could please bring a plate to share that would be great :)
Also if everyone could please bring along a wrapped mystery pize to the value of $5 for the Auction.

SAUSAGE SIZZLE $3 EACH (SAUSAGE ON BREAD WITH ONION, CHEESE & SAUCE)
BBQ DINNER WITH DESSERT $18 PER PERSON

BREAKFAST SUNDAY $8 PER PERSON

SOFTDRINK $2 PER CAN (COKE, PEPSI MAX, LEMON & ORANGE)
WATER $1 PER BOTTLE

Look forward to catching up wih everyone. Cheers Helen/VK4FHEL
